JOB OBJECTIVE

Engineer scalable, production-grade systems by combining full-stack expertise, cloud-native DevOps practices, & AI-driven solutions, while driving end-to-end ownership from concept to deployment & delivering high-impact, user-focused products.

PROFILE SUMMARY

- ➔ **Full Stack Engineer with approx. 4 years of experience** building scalable web, AI-powered, and cloud-native platforms.
- ➔ Currently working at **Sprowt Inc (US-based startup)** delivering AI-driven and multi-platform products.
- ➔ Strong expertise in **end-to-end ownership**, including system design, DevOps, and production deployments.
- ➔ Proven experience in **scalable systems, real-time applications, and performance optimization**.
- ➔ Known for **rapid prototyping, independent execution, and high ownership mindset**.

WORK EXPERIENCE

Senior Full Stack Engineer | Sprowt Inc., US (Remote) | Jan'26 – Present

Key Result Areas

- ➔ Building and maintaining features across **marketplace, AI tools platform, and multi-role dashboards**.
- ➔ Developing **scalable frontend architecture** across multiple production systems.
- ➔ Managing **AWS infrastructure using Docker-based blue-green deployments**, ensuring zero-downtime releases.
- ➔ Delivering **AI-powered features** including teaching agents, chat systems, and workflow tools.
- ➔ Supporting **iOS application deployments**, aligning backend services with **App Store production releases**.
- ➔ Owning **end-to-end lifecycle**, from development through deployment and monitoring.

Key Achievements

- ➔ Built **AI-driven academic tools**, improving user task efficiency and reducing workflow friction.
- ➔ Developed Resume Optimizer & MCQ Generator, increasing engagement by **17%**.
- ➔ Engineered AI teaching agent (LiveKit), improving learning efficiency by **36%**.
- ➔ Optimized AWS container deployments, reducing deployment time by **58%**.
- ➔ Accelerated feature delivery cycles by **7 days** through full ownership.
